

TV MOUNTS & STANDS

FLEX APPEAL

GETTING MORE FOR LESS

Articulating TV mounts that tilt in all directions but also let you move them up and down are the hot trend. Today's mounts also cost less and provide more features than ever before.

By Al Griffin

If you shop for the latest jumbo TV and plan to mount it onto your wall, then you'll be glad to know that articulating TV mounts, which let you extend the TV away from the wall and adjust its position in multiple ways, are more widespread than they used to be. What's more significant is that prices of TV mounts dropped substantially over the past 4 years.

Meanwhile, new TV stands are more streamlined than they were before.

TV STANDS

[P] BDI Icon 9429
